Professional Summary

- Senior Java Engineer with 9+ years of experience designing high-performance backend systems and microservices in fintech, logistics, and real estate domains.
- Expert in Java, Spring Boot, Hibernate, RESTful API design, relational and NoSQL databases, and cloud-native architectures on AWS/GCP.
- Proven success delivering enterprise platforms with US and Japanese teams, serving 100k+ users.
- Strong DevOps skills with AWS, GCP, Docker, and CI/CD pipelines.
- Led engineering initiatives that reduced server downtime by 60%, improved API response times by 45%, and cut infrastructure costs by 25%.
- Strong in Data Structures, Algorithms & Software Design.
- Adept at mentoring engineers, optimizing distributed systems, and driving software quality through data-driven architecture decisions

Technical Skills

Languages & Frameworks: Java, Spring Boot, Hibernate, JavaScript, TypeScript, Node.js, Nest.js, Next.js, Vue.js, Nuxt.js, shadcn.

Databases: Oracle, PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools: AWS, GCP, Docker, Git, Jenkins, JIRA, Confluence, Maven, Gradle, NPM, Swagger, Postman.

Concepts: Microservices, REST APIs, SSO, ORM, CI/CD pipeline, Agile, OAuth2, JWT

Professional Experiences

Sr. Full Stack Developer & SRE | Venturas-bd Ltd | Dhaka, Bangladesh | Jan,21 – Apr,24 (Hybrid)

- **Designed and deployed 17+ microservices** with Java, Spring Boot, and Hibernate, supporting fintech and logistics applications processing **100k+ daily transactions.**
- **Optimized SRE operations** on AWS/GCP, achieving **99.95% uptime SLA** and reducing cloud costs by **25%** through automated scaling and resource tuning
- **Improved API performance by 45%** by refactoring backend logic, introducing Redis caching, and applying database query optimizations.
- Partnered with cross-functional teams to deliver scalable solutions in an Agile environment.
- **Led a team of 5 engineers**, driving Agile ceremonies, mentoring juniors, and enforcing code quality through peer reviews, cutting production bugs by **30%**.

Sr. Software Developer | ProIT | Vilnius, Lithuania | Sep,20 – Dec,20 (Remote)

- Enhanced a content management platform by building new features in **Java and Spring Boot**, improving document processing speed by **30%**.
- Worked with European teams to deliver production features on time.

Software Engineer | Dynamic Solution Innovators | Dhaka, Bangladesh | Oct,14 – Aug,20 (OnSite)

- Developed financial systems (**InfoTRAC, InfoService**) using **Spring Boot, Hibernate, and PostgreSQL, MySQL, Oracle, MongoDB**, enabling secure daily statement processing for **50,000+ customers**.

- Mentored junior developers, conducted design/code reviews, and introduced CI/CD practices that cut release cycles from **4 weeks to 2 weeks**.
- Led **Oracle → PostgreSQL migration** for multi-terabyte databases, reducing license costs by **40%** while maintaining zero data loss.
- Designed and deployed **enterprise-grade architectures** with high availability and scalability, serving government and corporate clients.

Few Highlighted Projects

ChatGPT Gateway Admin

Role: Sr. Full Stack Developer & Team Lead

- Built an admin panel for ChatGPT subscription and billing management using **Spring Boot, Hibernate, and Next.js, MongoDB**, serving **7k+ monthly active users**.
- Led a team of 6 engineers, architected modular design, and introduced automated testing pipelines, reducing release defects by **35%**.

Sketch Real Estate

Role: Sr. Full Stack Developer & SRE

- Architected a real estate platform connecting architects with clients across Japan, using **Nest.js, Next.js, MySQL**.
- Implemented secure authentication, authorization, and billing, enabling a **20% increase in client onboarding efficiency**.

MyPage Billing System

Role: Sr. Full Stack Developer & SRE

- Designed and implemented subscription billing modules with **Java + MySQL**, handling **$2M+ annual revenue**.
- Optimized backend performance, reducing API latency by **40%**.

InfoTRAC & InfoService

Role: Software Engineer

- Developed modules for digital printing, daily notices, and targeted marketing for the fintech industry using **Spring Boot + Oracle/PostgreSQL**.
- Improved batch processing, reducing job execution time from **6 hours to 2 hours**.

DB migration tool (Oracle to PostgreSQL)

Role: Analyst

- Designed automated migration tools for enterprise-scale databases, analyzing **PL/SQL vs PL/pgSQL** structural differences.
- Achieved **100% schema compatibility** and seamless transition for multi-terabyte datasets.

Education

B.Sc. in Information & Communication Technology (ICT)

Mawlana Bhashani Science & Technology University, Tangail, Bangladesh | 2008 – 2012
