🪪 SUMMARY

I am a Java and Full-Stack Engineer skilled in building scalable and secure applications using modern Java and Spring technologies. I design clean architectures, develop reliable microservices, and create efficient REST APIs. I also build responsive front-end and mobile interfaces with Angular and Flutter. With strong system design and UML skills, I structure complex solutions using clear architectural models. I focus on clean code, performance, and delivering robust, cloud-ready applications.

✧ SKILLS

Programming Languages
- Java
- JavaScript
- TypeScript
- Dart

Frontend Technologies
- HTML, CSS
- Bootstrap, Tailwind

Reporting Tools
- JasperReports

Frameworks & Libraries
- Spring, Spring Boot, Spring Data JPA
- Angular
- Flutter
- Android

Cloud & Backend Services
- Firebase

Version Control
- Git, Github

Backend & API Development
- RESTful API Development
- API Security (JWT, OAuth)
- System Design

Databases
- MySQL
- Oracle Database
- MongoDB
- PostgreSQL

🎓 EDUCATION

Master of Science (MSc) in Botany,
Dhaka College
10/2023 — 02/2025 | Dhaka
  CGPA - 3.63 out of 4.00

Bachelor of Science (BSc) in Botany,
Dhaka College
12/2018 — 04/2023 | Dhaka
  CGPA - 3.47 out of 4.00

🌐 LANGUAGES

English

Bengali

Hindi

📖 COURSES

English Speaking & Writing
03/2024 — 07/2024
  Completed a course to enhance English communication skills, focusing on spoken fluency, writing clarity, and professional correspondence.

🎖 LICENSES / CERTIFICATIONS

Web and Mobile App Development using Spring Boot, Android & Flutter, IsDB-BISEW IT Scholarship Programme (Mar 2025 — Dec 2025 | 9.5 months)
  This certificate recognizes the successful completion of the Web and Mobile App Development program, focusing on Spring Boot and cross-platform mobile apps using Android and Flutter.

🗁 PROJECTS

Food Delivery System, Food Delivery Platform — Real-Time Order & Rider Management Tech: Angular, TailwindCSS, Spring Boot, PostgreSQL,OAuth, JWT, WebSockets. ✎

09/2025 — 12/2025

- Key Features:
4 user roles: Customer, Rider, Restaurant Owner, Admin. Real-time order tracking with live map updatesOTP-based delivery confirmation system. Restaurant & menu management with dynamic availability. Admin dashboard with live analytics & rider management. Auto-calculated rider payments: hourly rate, overtime, penalties & bonuses. COD accounting with automatic settlement & commission tracking. Push notifications + WebSocket live status updates.

Track & Chat — Android App, Tech Stack: Java, Android Studio, Firebase (Auth, Firestore, Realtime DB, Storage, Messaging), Google Maps & Location (OSMDroid, Play Services), Glide, WorkManager.

11/2025 — 12/2025

- Developed a real-time Android application allowing users to register with their phone numbers, search and connect with friends via friend requests, and chat securely. The app includes live location tracking of friends within chat rooms and an emergency SOS feature that shares the user's location with all connected friends.

Food Delivery App, Flutter Project

11/2025 — Present

- Developing a real-time Flutter application integrated with a Spring Boot + PostgreSQL backend, featuring restaurant browsing, food ordering, live rider tracking, OTP-based delivery confirmation, WebSocket chat, and shared group order rooms with synced carts. Upcoming enhancements include split payments, in-room invitations via QR code, order-related file sharing, message delivery status, customer—rider chat upgrades, and demo payment gateway integration .
