Summary

Full-Stack Developer with 5+ years of experience in cloud infrastructure, scalable web applications, and secure systems. Specializes in AWS, Azure, Google Cloud and Linux/Windows server management. Experienced in building high-performance web apps using Laravel, Node.js and React.js. Strong focus on cloud migration, infrastructure optimization, automation and penetration testing. Adept in DevOps pipelines, container orchestration and CI/CD strategies.

Professional Experience

Full-Stack Web Developer | Intradoc international
2020 – Present

- Built and optimized **high-performance web applications** using Laravel, Node.js, and React.
- Integrated **payment systems, analytics, and third-party APIs** into SaaS platforms.
- Developed **custom dashboards** for analytics, real-time chat systems, and e-commerce.
- Improved **website security and performance**, reducing page load times.

Highlighted Projects

- **Ultimate Farrier Software**
Tech: Laravel, React, Multi-tenant Architecture
 - Developed a scalable, cloud-based web platform using Laravel and React.
 - Implemented a secure multi-tenant architecture for efficient data isolation and management.
 - Delivered a production-ready system with optimized APIs and deployment.
- **SaaS POS System**
Tech: Laravel, React, Multi-tenant Architecture
 - Designed a **multi-tenant SaaS POS platform** with subscription management.

- Integrated with **Sage Pastel** ecosystem for accounting and finance automation.
 - Implemented **role-based access control** and **API-driven workflows**.
- **Campus Car Rental & Ride-Sharing App**
Tech: Next.js, Prisma, Clerk, MongoDB, Firebase, Pusher.js
 - Developed a **real-time student transportation platform** with ride-sharing and rental services.
 - Implemented **secure authentication** (Clerk) and **real-time chat** with Pusher.js.
 - Deployed on **Vercel** with optimized API routes.
- **AI-Powered Learning Platform**
Tech: Next.js, Node.js, AWS EC2, Vercel, OpenAI APIs
 - Built a platform combining **GPT-powered content generation** and **Matomo analytics**.
 - Architected **hybrid deployment** (Vercel frontend, AWS backend).
 - Added **image/video processing pipelines** with FFmpeg and Stable Diffusion.
- **Prepaid Wi-Fi Ticket Sales Platform**
Tech: Laravel, React, Payment Gateways
 - Created an **online prepaid Wi-Fi ticketing system** with back-office/admin controls.
 - Integrated **low-cost payment systems** for emerging markets.
 - Enabled **multi-provider hotspot management** for ISPs.
- **Telegram-Based Knowledge Platform**
Tech: OpenAI, Firebase, Next.js, Replit Deployment
 - Built a **simulation-based learning platform** with structured “Complexes” and “Cells”.
 - Integrated **AI-driven knowledge exploration** for interactive learning.
- **Tsunami Detection & Alert System**
Tech: IoT, Node.js, Cloud Integration
 - Designed a prototype **disaster detection and alert platform**.
 - Integrated IoT sensors with **real-time cloud-based alert notifications**.

Academic Qualification

B.Sc. in Computer Science & Engineering – Sonargaon University, Dhaka
2021 – 2024 | CGPA: 3.77 out of 4.00

Higher Secondary School Certificate – Kazi Mohammad Safiqul Islam College,
Brahmanbaria | 2015 – 2017

Core Skills & Competencies

Category	Tools/Technologies
Language	php, python, c, c++, dart, javascript, html, css
Backend Framework	Laravel, Node.js, Django
Frontend Framework	React.js, Next.js, Tailwind CSS, Bootstrap
Cloud Platforms	AWS, Azure, Google Cloud, Route 53, IAM, etc.
DevOps & Automation	Docker, GitHub Actions, Jenkins, CI/CD etc.
Databases	MySQL, MongoDB, PostgreSQL, Firebase, etc.
Security	Burp Suite, OWASP ZAP, Nmap, JWT, OAuth
Others	Linux, Git, Postman, Agile, Scripting

Hobbies & Interests

Problem-solving, Teamwork, IoT, Cybersecurity Research, Martial Arts
